## NOTES

(1) This Approved Special Processor Listing applies only to GE Aviation located in Whippany, New Jersey.

(2) When the drawing calls out a prime contractor's special process specification, the supplier shall only use a special processor from that prime contractor's Approved Special Processor Listing (ASPL). For example, when a drawing references Boeing process spec BAC 5423, the supplier shall only subcontract to a processor on the Boeing D1-4426 list.

(3) When the GE Aviation purchase order and/or SQAR requires the use of a prime contractor's ASPL, this requirement applies whether the drawing calls out a prime contractor's spec (e.g. Boeing BAC 5423) or an industry spec (e.g. MIL-DTL-5541, AMS 2700, ASTM-E-1417).

(4) This document is uncontrolled when printed - please check the ASPL on the link below for the latest revision status prior to selecting a special processor.
